Read the paragraph below and find the text in the maze.

Find the text in the maze!

What does a mother bird do? First, a mother bird lays eggs in the nest. Baby birds grow inside. Then they hatch from the egg. Next, the mother bird feeds them insects and worms. After that, the baby birds grow bigger and more colourful. Finally, the chicks grow up and fly away.

1. What does a mother bird do first?

2. What does a mother bird do then?

3. What does a mother bird do next?
